Using CINAHL — to find articles in Nursing Journals

This screen shot shows how to set up a search in CINAHL. In this example, we are searching for the keyword “asthma” in journals that have some form of “nurs” in the title (nurse, nurses, nursing, etc.).

For this search, we have requested research-based articles only.

Note that we have limited the search to Nursing journals available here at Ivy Tech — either in print or through a database.
